Care & Maintenance of Stainless Steel is very important.

Reports of stainless steel "rusting" are not uncommon. Contrary to people's belief, stainless steel is not a zero-maintenance product, and will corrode and stain if subjected to certain chemicals over prolonged periods of time. In a typical restroom environment, these harmful chemicals can come from many common sources, including:

*Under no circumstance should the following agents be used:

- Abrasive powders or scouring pads
- Water closet cleaners
- Ceramic tile cleaners
- Solutions containing more than 1% by volume of ammonia
- Solutions containing acids or lye
- Solutions containing enzymes

If the above instructions are adhered to, our product shall provide years of dependable service. Accurate Partitions Corp. shall not accept responsibility for product failure if the above instructions are not followed
