**Setting up Your e-pill MedGlider HOME**

If your device is not activated, please activate it now by removing the clear plastic tab from the back of your e-pill Medication reminder.

---

### Setting Time and Date

![Image of e-pill timer with buttons](image)

Lift the clear button cover on the face of the timer.

Hold down **SET** button until the time shown on the display screen begins to flash.

**TIME:** Press the **HOUR** button to increase hour (note AM / PM), Press **MIN** button to increase minutes. Once desired time is reached, press **SET**.

**MONTH:** The MONTH number will start to flash on the bottom left corner of the display screen. Press the **HOUR** button to reach correct month # (1-12). Press **SET**.

**DAY:** The DAY of the month will start to flash. Press the **HOUR** button to reach the correct day (1-31). Press **SET**.

**YEAR:** The YEAR will start to flash. Press the **HOUR** button to reach the correct year (20xx). Press **SET**.

**DONE:** Your settings have been saved.

---

### Setting Alarms

1. Press **MODE** button.

2. The 1 will start to flash on the display in the lower right hand corner.

3. Press and hold down **SET** until - - : - - starts to flash.

4. To change the hour, press the **HOUR** button. Continue to press **HOUR** until the desired alarm hour is reached. *Please observe the AM/PM Indicator.*

5. To change the minutes, press the **MIN** button. Continue to press **MIN** until the desired alarm minutes are reached.

6. Press **SET** to store the alarm time.

7. Press **MODE** and 2 (the second alarm) will start to flash.

8. Repeat steps 3 - 6 for alarms 2 thru 4.
Daily Use

Turning Off Alarms

When the timer beeps with the red light flashing that means it's time for you to take your medications.

Check to see which number (1-4) is flashing on the right bottom of the display screen.

If the number “1” is flashing, it is time to take your first dose of pills. Press the STOP button to stop the beeping & flashing light, and take the pills from pillbox “1”.

The same should be done for alarm “2”, “3”, and “4”.

Alarms will automatically reset at midnight each day and will repeat at the same time each day.

Erasing Alarms

To erase an alarm, simply press MODE until you reach the alarm you want to change (1-4).

Once you have reached the correct alarm hold down SET until - - : - - appears.

Press SET twice and only the current alarm number (1-4) will blink on the screen.

Press MODE to reach the remaining alarms and time.

Replacing the Batteries

1. Slide open the battery door by pushing down on the arrow firmly with your thumb.

2. Insert 2 AAA size batteries, making sure the negative (-) and positive (+) terminals are placed correctly. We recommend using two alkaline batteries.

3. Put the battery compartment cover back and lock it into place.

MISSED PILL INDICATOR

If “STOP” button is not pressed when the alarm is sounding, the alarm number will then be shown with an X meaning “MISSED PILL”.

Any time pills are missed, you should follow the directions from your physician or pharmacist before taking any medication (pill) out of sequence.
