**The CADEX Story**

The CADEX watch was developed by Diane Barker. Her mother had a condition and was having trouble taking her medication. In order for Diane to help she knew she had to create her own unique solution. The CADEX is an alarm watch as well as a medical alert bracelet. The unique alert button, when pressed, shows vital information (name, alert, allergy, doctor, contact, blood type, birthday, insurer, policy # & social security #). You can choose which information you input.
The e-pill Acutab is a semi-automatic pill dispenser that installs under or inside your kitchen cabinet. It can dispense up to 3 times per day. All the user has to do is walk over to the device when it is time to take their medicine and move a red lever from left to right to dispense the pills. This makes taking medication especially easy for arthritis patients or those with manual dexterity issues.

Benefits of an e-pill® Automatic Pill Dispenser

Peace of Mind & Cost Savings

An e-pill® Automatic Pill Dispenser provides the right medications at the right dose at the right time. This helps to:

- Preserve patient independence.
- Improve health by promoting patient compliance.
- Reduce medication errors and non-adherence.
- Reduce caregiver stress.

A recent clinical study shows an annual cost savings of up to $5,400 per dispenser in reduced hospital re-admissions and medication prompting visits.¹

How an e-pill Automatic Pill Dispenser Works

The machine is filled by a caretaker or pharmacist, then the unit is locked. Alarms are set to go off at the same time every day.

How often will the automatic pill dispenser need to be filled?
