

ERA

Office Chairs

Options Guide

Office Chair Arm Options

Flip-up Arms are standard, and are an ERA key feature.

Four-way Adjustable Task Arms are an available option, with two different pad options:

Diamond Pads are a smooth pad with a 3D Diamond pattern.

P-Shaped Arm Pads are sleek, rounded, and form a P shape on the task arm.

Pneumatic Gas Cylinder Lift Options

A **3" Cylinder** lift is standard, and is perfect for most customers.

A **2.5" Cylinder** lift is recommended for customers of a height less than 5'6" tall.

A **3.5" Cylinder** lift is recommended for customers of a height above 6'2" tall.

Heavy-Duty Roll-Control Dual Wheel Caster Options

Customers can choose freely between two special caster options.

Hard Wheel Casters are specially made for carpeted surfaces.

Soft Wheel Casters are specially made for wood and concrete surfaces.

5-Leg Intensive Use Office Chair Base Options

28" Base is heavy-duty and intensive use rated, and is available in a chrome or black finish.

30" Steel Base is extra heavy-duty all steel, and is also available in chrome or black finish.

Upholstery Material Options

Fabric upholstery material is a durable polyester cloth that is both stain-resistant and anti-microbial due to its Teflon coated backing.

Full-Face Leather means every part of the chair that your body touches while seated will be upholstered in genuine, top-grain leather, and the sides and back of the chair are made of a matching synthetic material that looks and feels just like genuine leather.

All Leather means your chair will be upholstered in 100% top-grain genuine leather.

Synthetic Leather means the chair will be fully upholstered in an automotive-grade vinyl, which looks and feels like leather, but is a synthetic material, not genuine leather.
