

4-Line Corded/Cordless Small Business System

Accessory Handsets • Repeaters • Cordless Headsets

The pace of business is always accelerating and small businesses need tools that help them do more, faster and cost effectively. The AT&T SB67118 cuts reaction time to calls with Push-to-Talk Intercom and the exclusive DECT 6.0 SB67128 repeater extends the phone range to reach employees in the largest warehouses and remote buildings.

The SB67118 corded base supports four lines, each with an Automated Attendant, and up to 10 SB67108 Accessory Handsets with individual voicemail. Each extension provides line status and message-waiting indication plus caller ID and call waiting information on a large lighted display. Mobile employees have easy access to Push-to-Talk Intercom, call transfer and 3-way conferencing as well as the choice of standard or speakerphone operation. The corded base will also pair with the AT&T TL7600 Cordless Headset to provide hands-free mobility.

Up to 10 Accessory Handsets

Push-to-Talk Intercom
