

FOLOMOV A1 Magnetic USB Cable Charger

Folomov A1 is a **patented and creative** magnetic USB cable charger. It is designed for helping users **charge** 3.6V/3.7V Li-ion batteries more conveniently and expanding the application range of batteries. With A1, users can easily use a 18650/26650... to **charge** other USB devices, such as cellphone. **Compact size and light weight** makes it easy to carry and use everyday and outdoors.

Specification:

Output / Input: DC5V 1A

Max charging current: 1A

Max discharging current: 1A

Net weight: 21g

Gross weight: 46g

Dimension: 185mm x 35mm x 9mm

Compatible with 3.6V/3.7V Li-ion batteries:

26650	21700	20700	25500	22650	18700	18650	18500	18490	18350
17670	17500	17335	16340	14650	14500	10440	10350	10340	

Function:

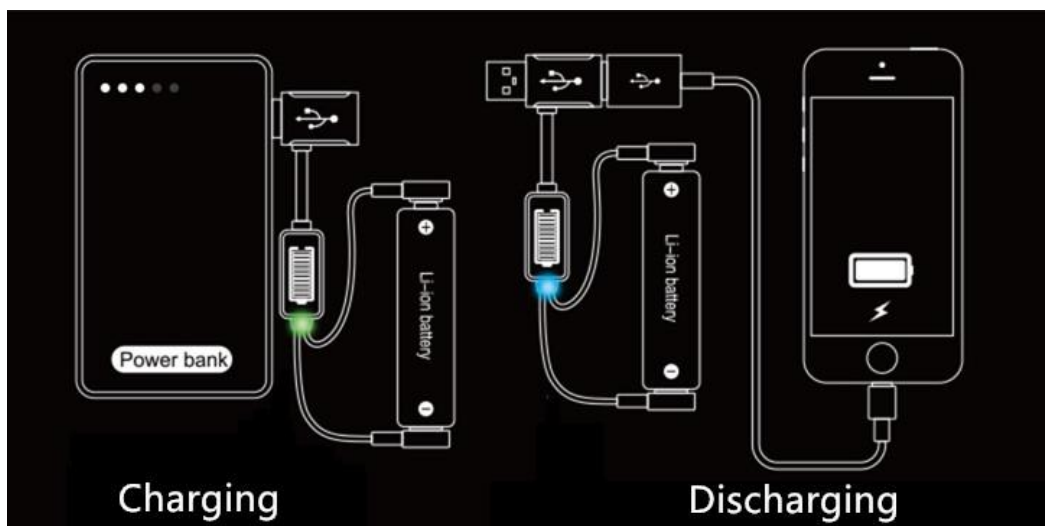

(i) Charging -- USB powered with max 1A charging current. Provide you an easy way to charge your batteries.

(ii) Discharging -- Enable Li-ion batteries to discharge and provide power to other USB devices.

(iii) Intelligent detection -- Power indicators show you battery's current status.

1. Blink green LED means battery is being charged.
2. Solid green LED means battery is full charged.
3. Solid blue LED means battery is discharging.
4. Blinking red LED means battery's 2 terminals are connected incorrectly.

Connection:

Features:

Automatically activate 0V battery

Constant current and stable voltage charging mode

With reverse polarity protection

Wide application. Can serve a wide range of battery users.

What is included in the package?

1 x Folomov A1 Charger (excluding the battery)
