TIGHT FIT[®] HEX BIT

DRILL & SCREWDRIVER
ATTACHMENT KIT

Fits Into
1" x 2 1/2" Openings

**Saves
Time, Money
& Frustration**
When faced with
Tight or Hard-To-
Reach Problems

Works with:

- All Power Drills
- Power Hex Screwdrivers
- Hand Hex Screwdrivers
- Standard 1/4" Hex Tools

- Drill holes or drive screws
- Reach around obstructions
- Rotate 360°; reach deep
- Full 75 in/lbs of torque

Great For:
Home, Car, Boat, RV,
Plane, Hobby or Work
repairs & installations

Tight Fit® Drill Kits

The Tight Fit® Drill Kit is a power drill accessory tool set that allows drilling or other work to be done in spaces as small as one by two inches (1" x 2"). Installations or repairs can be made without disassembly of other components. The aircraft style 90 degree right angle drill attachment works with all standard power drills and accomodates a large assortment of drill bit diameters and lengths, extensions, screwdriver bits, and other tools used for close-quarter installations and/or repairs. Tight Fit® Tools make it possible to drill or drive screws in tight areas, around corners, over obstructions and into deep or narrow recesses. Refer to specific items for more complete tool descriptions.

00100

The Basic Model 00100 Kit includes: an aircraft style Right Angle Drill Attachment, a 1/8" short aircraft quality TightFit® threaded shank drill bit, and a TightFit® 3-Way Wrench (1/4", 5/16" & 7/16").

00105

The Boxed Standard Model 00105 Kit includes: everything listed in the 00101 except the storage pouch which is replaced with a red, heavy-duty, blow-molded storage case.

00101

The Standard Model 00101 Kit includes: an aircraft style Right Angle Drill Attachment, Threaded Six Inch Drill Extension, Chucking Spud, six aircraft quality TightFit® threaded shank drill bits (00131), a TightFit® 3-Way Wrench (1/4", 5/16" & 7/16"), and a compartmented storage pouch. **Note:** This item has been discontinued.

00106

The Collet Model 00106 Kit includes: an aircraft style Right Angle Drill Attachment, four straight shank, short length (1.1875") drill bits (3/32", 1/8", 5/32" and 3/16") with matching precision-machined threaded collets (instead of the need for threaded shank drill bits), and a TightFit® 3-Way Wrench (1/4", 5/16" & 7/16").

00102

The Professional Model 00102 Kit includes tools listed in the 00101 Kit plus the following items: 12 TightFit® threaded shank drill bits (fractional sizes: 3/32", 1/8", 5/32", 3/16", 7/32" & 1/4", in short and stub lengths), 4 Piece Threaded Screwdriver Bit Set (00155), Threaded 1/8" & 1/4" Collets (allows tight fit use of wire wheels, rasps, files, sanding drums, etc.). Packaged in a red, heavy duty, blow-molded storage case.

00110

The 1/4 Inch Hex Bit Model 00110 Kit includes: an aircraft style Right Angle Tool Attachment, six aircraft quality TightFit® hex shank power drill bits and four hex screwdriver power bits (#1 & #2 Phillips and #3-4 & #6-8 slotted). Packaged in a reusable slide pack.

Extension Tool Set

00120

Drill/Tool Extensions thread together to form lengths of: 5/8, 3, 6, 9, 12, 15 & 18 inches. May be used direct or with the Right Angle Drill Attachment. (Does not work with 00106 or 00110 kits)

About TightFit® Threaded Shank Drill Bits

TightFit® threaded shank drill bits comply with National Aerospace Standards. The Standard provides the following description, "A special short flute, heavy duty drill designed for drilling the hard, high strength alloys used in aircraft manufacturing." The drill bits are made from M2 or M7 tool steel with self-centering, 135°, P3 split points and a Rockwell C scale hardness of 63.5 to 66. They are manufactured as right-hand tools with 5/16" hex wrench flats and 1/4-28 UNF-2A external threads. TightFit® threaded shank drill bits are concentric, self-tightening, non-slipping long life tools designed for work in limited space situations. (Does not work with 00106 or 00110 kits)

Screwdriver Bit Set

00155

Threaded screwdriver bits work with the Right Angle Drill Attachment, Extensions or Chucking Spud for close-quarter installations. In the Set are Phillips #1 & #2 and Slotted 3-4 & 6-8. (Does not work with 00106 or 00110 kits)

CAUTION

Wear safety goggles when using these tools. Do not exceed 2500 RPM. Grip Right Angle Drill Attachment firmly. Keep tools away from all children.

Right Angle Drill & Tool Attachments

The aircraft style Right Angle Drill & Tool Attachments only require 2" or 2-1/2" of clearance. They are compatible with all standard power drills. A molded cavity insures a consistent fit for the precision-made internal components which include: heat treated steel machined bevelled miter gears, hardened thrust block and driveshaft, and oil-impregnated bearings. The hinged housing opens for easy periodic lubrication and is sleeved by a non-slip knurled, black anodized aluminum grip. In addition to TightFit® drill bits, many other close-quarter tools can be used. The 00400 accepts 1/4-28 threaded shank tools. The 00405 is reversible and accepts 1/4" hex bit tools. The 00410 uses collets (3/32", 1/8", 5/32" & 3/16") and accepts round straight shank tools.

00400

00405

00410

Threaded Tool Extensions

Chucking Spud (00450)
Allows TightFit® threaded shank drill bits and other threaded tools to be used normally with reduced tool change times.

00450
Chucking Spud

00452
3" Extension

00454
6" Extension

9" Extension

About Drill/Tool Extensions

Threaded Extensions are extremely versatile and provide the functional utility of several extension drill bit sets. Too often drill bits are too short or too long for specific jobs. The Extensions thread together to create a variety of tool lengths necessary to get at a problem in a deep or narrow location. In addition to TightFit® threaded shank drill bits, the extensions work with a variety of other threaded tools. They also work with the Right Angle Drill Attachment for getting around corners or over/under obstructions. (Does not work with 00106 or 00110 kits)

Collet Conversion Kit

00240

A six piece collet conversion kit that includes a front collet gear, gear support, 3/32", 1/8", 5/32" & 3/16" collets. Convert your right angle drill attachment (00400) to accept round straight shank tools.

TightFit® 3-Way Wrench

00491

Custom stamped wrench used to remove threaded tools that self-tighten during use. 3-way design works with various wrench flats: 1/4" hex Screwdriver Bits, 5/16" hex TightFit® drill bits and Extensions, and 7/16" hex Countersinks, etc.

Threaded Tool Collet

00500/00502/00504/00506/00508/00510

Allows close-quarter use of standard round shank tools like: wire wheels, files, rasps, sanding & buffing drums, etc. Works with Right Angle Drill Attachment (00400) and Extensions. Available in 3/32", 1/8", 5/32", 3/16", 7/32", 1/4"

Threaded Countersink

00525

1/2", 6 flute, 90°, high speed steel countersink/deburring tool for general purpose work in confined areas. The Countersink can be used to deburr or chamfer with the Right Angle Drill Attachment (00400), Chucking Spud, or threaded Extensions.

TightFit® Drill Bits

TightFit® threaded shank drill bits are available in an assortment of diameters and lengths. See the order form for a list of stock items.

Through our Special Order Department, TightFit® drill bits are available in other materials (cobalt steel, solid carbide, etc.), lengths, diameters, and types. Reamers, core drills and stepped or piloted cutting tools are also available. Tools can be made to your specifications.

Aircraft quality cutting tools are also available unthreaded.

TightFit® 1/4" power hex drill bits are currently available in a few diameters and lengths. See the order form for a list of stock items.

"Tools For Hard to Reach Problems"

Aircraft manufacture and repair requires tools designed to work in very limited spaces. The types of tools illustrated are typical of those used in the aircraft industry. TightFit® drill bits meet or exceed National Aerospace Standards with respect to material, geometry and hardness. Tight Fit® Tools will save you time, money, and frustration.
