

HOW TO DRY CUSHION FOAM

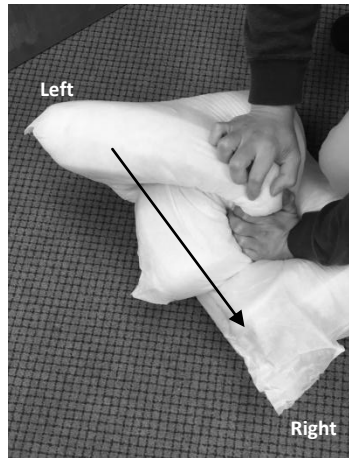

Follow these simple steps to dry out cushion foams. Please use protective cover during rain to prevent foams from getting wet.

1. Unzip cover and remove cushion foam.

(Tip: Fold cushion foam in half after unzipping cover for easy removal)

2. Wring water out by rolling foam from top to bottom and side to side. Squeeze foam.

3. Lean foam against a wall at an angle to drain any excess water. May take up to few days. Once foam is dried, place covers back on.
(Tip: Fold cushion foam in half to easily insert foam into cover)
