

July 2020

Dear Valued Customer:

Thank you for your interest in the BD Veritor™ System for Rapid Detection of SARS-CoV-2 test

The new point-of-care test is easy to implement with a flexible workflow similar to the BD Veritor™ System Flu A+B rapid test.

You must update your current BD Veritor™ Plus System Analyzers to run the new BD Veritor™ System for Rapid Detection of SARS-CoV-2 test. To update, simply order a BD Veritor™ Plus System SARS-CoV-2 USB and follow the included instructions. With a single USB, you can upgrade as many BD Veritor™ Plus System Analyzers as needed. **Please note you only need to order one USB per ship-to location, as one USB can update all Analyzers in the same location.**

**The new product numbers are:**

- BD Veritor™ System for Rapid Detection of SARS-CoV-2; Cat. No. 256082
- BD Veritor™ System SARS-CoV-2 Upgrade USB Key; Cat. No. 445006

**How do I order?**

- You can contact your preferred distributor directly.

Please note that for the month of July, we will be manually allocating inventory while we quickly ramp-up our supply.

As always, please feel free to contact your BD representative or our customer care line at 1-844-8-BD LIFE should you have additional questions. For additional resources and questions, do not hesitate to visit our customer support page at [www.bd.com/COVID19](http://www.bd.com/COVID19).

We appreciate your patience and understanding during these unprecedented times. We stand behind our mission of Advancing the World of Health™.

Sincerely,

A handwritten signature in black ink that reads "Katherine Benedict".
