

PHOTOGRAPHY INFORMATION

PHOTOGRAPH INFORMATION:

Please do not wear makeup of any kind. We need to clearly see your bone structure, skin (freckles, uneven coloring and all), eyes and hair. No colored contact lenses. No glasses. This will help us identify your individual color spectrum and harmony.

IMPORTANT: The pictures should be of high resolution (clear and large) and good **natural** lighting. Best lighting is outside, **filtered**, face facing toward the direction of the sun (preferably morning hours between 9 a.m. – 11:00 a.m.). Clarity is very important to pick up the subtleties of your skin tone. No direct harsh sunlight. Please send the following:

1. Head shot of you looking straight ahead (hair pulled back).
2. Head shot of you looking straight ahead (hair down in its natural flow).
3. Side profile of your face.
4. A photograph of your hands with your fingers together.
5. A photograph of your eyes (we need to see your eye color).
6. A full standing picture of yourself in form fitting clothing.
7. If you color your hair, a picture when younger with natural hair color (optional).

Please don't include any photograph using Photoshop, or where a professional applied color altering filters (glamour shots, school photos, wedding pictures). Wear a neutral fabric around your face (black, white, brown, grey, tan, beige or navy).
