

## ROCK CANDY ICICLES

### Ingredients:

4 cups sugar

1 cup water

Clean glass jar

String, cut into 6-inch lengths

Pencil

### Instructions:

MOM and DAD - In a medium saucepan, heat two (2) cups of the sugar and the water on medium heat. Do not boil! Stir until the sugar is completely dissolved.

MOM and DAD - Pour the solution into a clean glass jar and tie the pieces of string to the pencil and suspend the pencil and string across the mouth of the jar so that the ends hang into the sugar water.

CHILD - Crystals will form in an hour and continue for several days to a week. Pieces can be broken off and eaten after the first hour. (But, try to hold out for big crystals!)
