## Instructions for Installation and Care of

### Kubota RTV X900

#### Soft Top Cap

KU-X900-TC01

**Notice: Do not smoke inside the cab or expose the enclosure to direct flames. Cab is Flammable.**

1. Be sure to read these instructions thoroughly before opening and installing the Kubota RTV X900 Soft Top Cap. The installation is best done when the temperature is 70 degrees F. or warmer. The temperature affects the adhesive Velcro, if conditions prevent installing in warmer weather it helps to store the adhesive Velcro at room temperature prior to installation.
2. Carefully open the carton and remove the enclosure on a large flat surface that is clean and free of dirt.
3. Check over the parts included in the carton with the parts list shown below:

Adhesive Velcro Hook Strips:            5 each-----6”

Webbing straps with Velcro                4 each

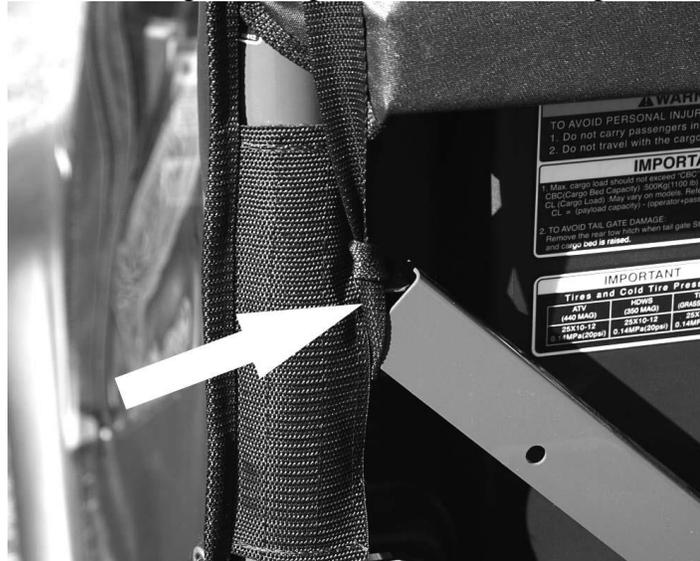

Webbing Straps with Loops                2 each

Webbing Straps with Grommets            2 each

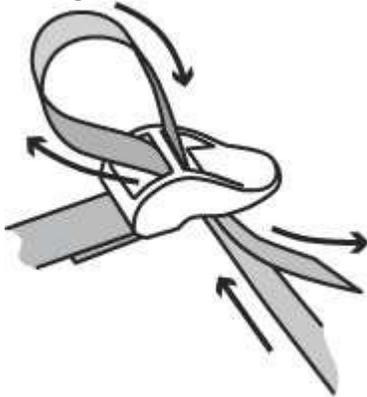

4. Begin by wrapping the front bars of the roll cage with the 6” adhesive Velcro. Do this roughly halfway up the bar. Then wrap the double-sided Velcro sewn to the end of the straps tightly around the adhesive Velcro. See Photos Below

5. Then install the rear straps with the loop on the end. Run the strap around the end of the brace behind the seat and through the loop in the end of the strap. See Photo Below

6. Now throw the Top Cap over the cab and attach it using the straps. Run the straps through the ladder lock buckles as shown in the diagram below.

7. Once all four straps are in the buckles, pull them tight making sure to center the top and that the front edge of the top is an inch or so below the holes across the top of the windshield. Once the straps are pulled tight they should look like the picture below.
