Handsome recessed frame enhances and protects the sign.

DOT Approved Imperial Sign System

Imperial Street Signs are constructed entirely of aluminum and stainless steel (will not rust or rot). Cast aluminum back plates for all residential traffic sign shapes can be bolted onto the pole. All signs are built to DOT specs which measure 7' from bottom of first sign to ground unless designated otherwise. Overall height is determined by configuration. Poles come in three lengths: 14' 6", 12', 11'. Pole A, 3" OD; Pole B, 2-3/8" OD.

Street sign blades and frames are of cast aluminum. Specify either hanging (H) or bolt-on (B). A scroll arm (SA) is needed for hanging blades or blade frames. Raised letter blades are bolt-on only (two sided in black, white or dark green). The raised letters and border come in black, gold, or reflective white. Custom colors available.

Specify a Finial and Base

Direct In-ground Installation
Heavy-duty underground aluminum extension won't rust or rot.

All Poles DOT Approved!

Imperial signs are approved by the U.S. Department of Transportation (DOT), meeting the standards outlined in the National Cooperative Highway Research Program (NCHRP) Report 350 designed for the National Highway System (NHS). All poles - A, and B Series are approved. Meeting this requirement allows our products to be used on any roadway, whether it's a part of the NHS or not.

Specify a Blade

RLB-B-ORN*
Raised Letter Blade (bolt-on) with ornate decorative scrolls.
