The ACT-21 and ACT-22 digital transmitters are wireless radio controls designed for use with AMII or AccessPro receivers. In addition the MegaCode code is compatible with LinearMegaCode receivers and can be used with MDR and MDRG type garage door and gate receivers.

The MegaCode radio format provides unparalleled security. The format provides more than 1 million different codes. MegaCode transmitters and receivers do not contain a typical "coding switch". Each transmitter is permanently coded at the factory to a unique code. The receiver is programmed by "learning" the transmitter's unique digital code. The receiver will activate only from these "memorized" transmitters.

Block coded versions of these transmitters (ACT-21 and ACT-22) can be ordered from the factory. Block codes are divided up as 16 facility codes, and 65,500 sequential local ID codes. This will save time when programming and maintaining large numbers of transmitters in an application.

Operation Instructions

ACT-21

The transmitters are powered from two 3-volt "button cell" batteries (type CR1616, CR1620, DL1620 or equivalent). The batteries should last up to 5 years with normal use.

To prepare to use
Program transmitter into receiver. Refer to the instructions provided with the receiver to set it into a "learning" mode. Activate the transmitter to program it into the receiver.

WARNING: HOLD BOARD BY EDGES ONLY

WARNING: HOLD BOARD BY EDGES ONLY

Place board alignment posts

Send a signal to program the receiver by pressing the button to be used with that receiver.

RECEIVER MUST BE IN A "LEARN" MODE TO ACCEPT THE TRANSMITTER

TO REPLACE BATTERIES

STEP 3 Replace the batteries. Remove the old batteries, noting their location and placement. Replace the batteries with fresh type CR1616, CR1620 or DL1620 batteries. Both batteries must be the same type.

Staple three-wire "button cell" batteries type CR1616, CR1620, DL1620 or equivalent. The batteries should last up to 5 years with normal use.

To conserve battery life, an internal timer limits the transmission duration to 10 seconds if a transmitter button is held down.

Material: 20 Lb. Mead Bond
Size: 8.500" X 11.000"
Ink: Black

LINEAR LIMITED WARRANTY

This product is warranted to the consumer against defects in material and workmanship for one year from the date of purchase. This warranty applies to first retail buyers of new devices. Warrantor will replace, or at its option, replace, any device it finds to be defective under this warranty, and will pay all labor and materials expenses related to the repair or replacement of defective products. The manufacturer reserves the right to send the repaired or replaced device to the consumer at the warrantor's cost. For warranty service and shipping instructions contact warrantor at the address shown below. Devices must be sent to warrantor for service at owner's expense. The remedies provided by this warranty are exclusive.

All products returned for warranty service require a Return Product Authorization Number (RPA#). Contact Linear Technical Services at 1-800-421-1587 for an RPA# and other important details.

Important!!

Linear radio controls provide a reliable communications link and fill an important need in portable wireless signaling. However, there are some limitations which must be observed:

• First, radio products are not public safety devices. The radios are not intended to comply with FCC Rules and Regulations as Part 15 devices. As such, they have limited transmitter power and therefore limited range.
• A receiver control responds to more than one transmitted signal at a time and may be blocked by interference from other radio transmitters. This may lead to misoperation of the receiver, which could result in an unsafe condition.
• Changes or modifications to the device may void FCC compliance.
• Frequently used radio links should be tested regularly to protect against unauthorized interference from other radio links.

A general knowledge of radio and its vagaries should be gained prior to acting as a wholesale distributor or dealer, and these facts should be communicated to the ultimate users.
