Upgrade to OmniControl™ Board  From the older style control board

Replacement of Board

[Diagram of control board with labels: Nut, Wire Harness, Chassis Ground]

**WARNING**

To prevent possible SERIOUS INJURY or DEATH from electrocution, disconnect electric power to operator BEFORE installing. ALL electrical connections MUST be made by a qualified individual.

**Caution**

Terminal connections for OmniControl™ are different than the existing board terminal connections.

Limit Switch Wiring

**CSW-200**

Remove Blue Wire

**SL-3000**

Remove Purple Wire

Remove Blue Wire

The blue and purple wires are NOT used on the limit switches with the OmniControl™ board. Reconnect power to operator after installation is complete.
