

Our A703 and A708 Blue Lights consist of an “always on” blue light to mark the location of an emergency telephone or other device. When activated, the strobe quickly alerts security personnel. When used with a T2100 series telephone, the strobe can be programmed for different activation durations and sequences.

**A703**

**Key Features:**

- ADA compliant
- Sealed assembly
- High performance illumination
- Optional colored area light domes
- Pipe or flush mounting
- Double domed for increased vandal resistance

**Specifications:**

- **Dimensions:** 8-13/16" diameter x 8-5/16" H
