

The 36" Emergency Call Station provides an easy and economical solution for emergency communication and signaling. The Call Stations are compatible with all T2100 telephones.

The T2100 series of emergency telephones are designed to withstand the rigors of harsh weather and environments, with electronics sealed with a Mil-Spec protective coating and protected speaker and microphone openings. They can be connected to analog telephone lines from any CO, PBX, or Key system, or integrated into VOIP systems through a VOIP gateway.
