FCC Notice

Janus phones comply with Part 68 of FCC Rules. The label affixed to equipment contains, among other information, the FCC Registration Number and Ringer Equivalence Number (REN). You must, upon request, provide this information to your telephone company. The REN is useful to determine the quantity of devices you may connect to your telephone line and still have all devices ring when your telephone number is called. In most, but not all areas, the sum of the RENs of all devices connected to one line should not exceed 5.

To be certain of the number of devices you may connect to your line, as determined by the REN, you should contact your local telephone company to determine the maximum REN for your calling area.

The following jacks must be ordered from the telephone company in order to interconnect this equipment with the public communication network: RJ11.

An FCC compliant telephone cord and modular plug are provided with equipment. Equipment is designed to be connected to a telephone network or premises wiring using a compatible modular jack that is Part 68 compliant. See Installation Instructions for details.

If equipment causes harm to the telephone network, the telephone company may discontinue your service temporarily. If possible, they will notify you in advance. If advanced notice is not practical you will be notified as soon as possible. You will be informed of your right to file a complaint with the FCC.

Your telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the proper functioning of your equipment. If they do, you will be notified in advance to give you an opportunity to maintain uninterrupted telephone service.
