

The Phone Line Monitoring Alert Panel meets the ASME / B44 2009 and 2010 code that requires audible and visual signal in the lobby in the event of phone line failure. When used with our EMS phones, that have the phone line monitoring option, the LMA unit completes the system.

Part #: LMA

Features:

- Supplied with standard 12vdc/0.5A transformer
- Meets 2009 and 2010 ASME/B44 code requirements
- Audible and visual signals when phone line fails
- Reset allows audible signal to be silenced with standard J200 key
- Resets automatically when phone line is restored
- When used with LMX unit, up to ten phones can be connected to the LMA panel
- Test feature available
- Onboard volume control for audible signal
- Supports external 12v LED / bulb

Specifications:

Dimensions: 10.5" H x 5" W x 3" D

Weight: 4 lbs.

Operating current: 400mA

Operating Voltage: 12-24vdc

Operating Temp: 32 to 158 degrees F

Storage Temperature Range: -4 to 158 degrees F

Relative Humidity: Up to 95% (non-condensing)
