

vigilant™ High Security Cluster Box Unit

NOTES:

ALL High Security Cluster Box Units (HSCBU) Types have a pedestal designed to ensure installed height meets all USPS installation requirements without additional adjustment.

All HSCBU Types include sufficient compartments to comply with the new March 15, 2012 ADA unobstructed reach stands which were lowered from 54" to 48" and include 5% of all mailboxes to be compliant.

Sequential numbering of mailbox compartments (in lieu of house numbers) may allow greater flexibility in providing accessible tenant compartments to meet applicable regulations.

Consult local authorities for applicable accessibility requirements related to mailbox project.
