

Mailbox Care Instructions

Thank you for purchasing your QualArc mailbox. Your mailbox has a highly durable, weather-resistant, powder coat textured finish. Please keep in mind that in coastal salt-air locations (or areas where roads are salted), your mailbox may require regular fresh water rinsing to remove corrosive salt residue that can damage the finish. In southern states that receive more UV radiation, you may notice some fading over time. As part of normal maintenance, your mailbox may need to be repainted to restore its original beautiful appearance.
