

SUPER EASY INSTALLATION

To attach your rain chain:

1. Simply insert the included gutter installation clip into your gutter (clip is flexible and will easily bend to fit any gutter).
2. Rain chain hangs right onto the hook of the clip. Wait for rain & enjoy!

Rain chain extensions can be purchased in 3 ft. increments and combined to achieve any length.

Use an optional decorative catch basin at the bottom to contain the rain as it trickles down the rain chain.
