**6290W**

7" Color Touchscreen Keypad with Voice Annunciation

The Honeywell Home 6290W 7" color graphic high-resolution touchscreen keypad with voice annunciation is the ideal choice to increase keypad revenue on new installations, as well as an easy upgrade opportunity for existing VISTA® residential and commercial installations.

The thin/sleek design will look appealing in any residence or business. The ability to add pictures and videos to the home screen lets users customize it to their own preferences, or dealers can add their company logo or message for increased awareness and referrals.

The intuitive menu driven user interface and voice annunciation of alarm conditions and system status helps end-users easily control basic or advanced functions and understand system conditions. Additionally, voice annunciation gives occupants the information they need to react during an emergency...when seconds count.

Resideo can push critical software updates directly to field installed units or a micro SD/SDHC card slot on the side, enabling users to update the software locally helping reduce costly site visits.

The backplate was designed to easily upgrade already installed 6160 and 6280 keypads, helping deliver more value to existing customers and protect from competitive takeovers.

### FEATURES

- High resolution 7" Touchscreen WSVGA with a resolution of 1024 x 600
- Thin tablet like design – less than 1" off the wall
- Intuitive touchscreen with clear identifiable icons and easy to use menu driven prompts
- Voice annunciation of system status (Ready to arm/Not ready to arm) type of alarm (Burg, Fire, CO) and zone affected
- Software is updatable either via push from Resideo for critical updates or micro SD/SDHC card on the 6290W for local onsite updates
- Authorized end-user can add or delete user codes (can add as many as specific panel supports)
- View when and who used the system, track employees and temporary guests, know when family members have disarmed the system via the event log
- View system status of each zone in the zone list status screen
- End-user can easily bypass zones
- Backplate designed to easily update or retrofit current 6160 and 6280W installs
- Emulation of standard 6160 alpha display keypads
