

Putting on your "S" Hook Bracelet

Don't worry; it's simple once you've got the hang of it.

Slip the opening of your bracelet onto your wrist sideways; the thinnest part of your wrist, the same way you'd put on a solid cuff bracelet. Try not to spread the bracelet open. It will slip over your wrist with little effort.

Turn your bracelet around as you would be wearing it. Turn your wrist towards your palm side up. Pull the "S" hook and place it into the opposite end of your bracelet. I rest my bracelet and wrist against my body for help. You may need to slightly press the bracelet inwards and slide the "S" hook into position (opposite end of bracelet).

HINT: Don't spread your bracelet open to put it onto the widest part of your wrist (from the top of your wrist palm facing downward). This will pull the bracelet apart and will distort its shape. If this happens, you can carefully reshape your bracelet once it's on your wrist.
