Caution

- Never try to open the charger.
- Do not touch water or moisture.
- Please make sure the polarity of the output is the anode inside and the cathode outside. Do not use it for other purpose.

Characteristic

Portable, wide voltage input and charging SWIT lithium-ion battery rapidly. It's applicable universal.

Usage

During the term of charging, the LED indicator light shows red and turns to green when finish charging.

Caution

- Please use it in the temperature between 0°C-40°C.
- Keep the electrodes clean and ensure reliable connection.
- Please keep it in cool and dry environment.

Specifications

- Input: 100~240VAC,50/60Hz
- Output: 14~16.8V DC,1.5A
- Power consumption: Max 50W
- Dimension: 120×60×38mm
- Weight: 0.25kg
