HIGH IMPACT

LOGO +	CLEAR
LOGO + S	SPECIALS
LOGO + V	VARIABLE

**VIGOR RECOMMENDS NOT TO EXCEED 3
CHARACTERS FOR BEST IMPRINTING**

6 Week delivery. Stamps cannot be returned.

Marking

Basic Impact lenses will be marked in the same fashion as lenses under current ANSI Z8Z.1 standard. This is the manufacturer's logo and any shade number, special purpose designation (S) or photochromic designation (V). For example, if ABC Laboratory uses "A" as its manufacturer's logo and the lab produces a Transitions plastic lens, the lens would be marked A V.

High Impact lenses will be marked the same as a Basic Impact lens except a "+" would follow the manufacturer's logo. If ABC Laboratory produced a polycarbonate Transitions lens, the lens would be marked A+V
