

# INSTALLATION PRECAUTIONS

All units have been vehicle and bench tested before shipping.

Before installing this unit find out what damaged the original computer. Fix whatever caused the damage before installing the replacement unit. Electronic Control Computers rarely fail unless something has put an excessive electrical load on the unit. Resistance checks must be performed on each circuit controlled by the ECC. Test all solenoids for shorts or defects. Check coils, short circuits in the wiring harness and damage to the injector harness. Also check shorts in the alternator, faulty CAM or Crank sensors etc. etc. **Any damage caused by the vehicle will void the warranty.**

## FAILURE TO SEND THE OLD COMPUTER WILL VOID WARRANTY AND YOU WILL BE CHARGED \$100

### REFUND/EXCHANGE AUTHORIZATION FORM

Please contact our office before sending the computer back to us.

EXCHANGE/Replacement

Reason for exchange/refund request:

---

---

---

By requesting a replacement you are agreeing to our terms and conditions. After a replacement has been granted, there are no refunds. If you are requesting a refund, there is a 20% restocking fee minus all actual shipping charges. If we find the unit to have been damaged by the customer's vehicle and/or the core is not returned within 14 days the warranty will be voided and you will be subject to a charge of \$100.
