

SprayMax, 2 Part (2K) Urethane Aerosol

SprayMax now offers a 2 part (2K) Urethane Aerosol topcoat . This 2k urethane topcoat spray has a much higher U.V. and weather resistance than any standard aerosol on the market today. Contrary to standard aerosol paint technology, Spray Max uses an innovative nozzle technology in combination with a new propellant technology. Spray Max offers a higher yield, a faster spray time, and a wider more even spray pattern than your standard conventional aerosol spray can.

Spray Max 2K Urethane Benefits:

- Professional paint results like a spray-gun
- No paint mixing
- No cleaning of the spray-gun
- No solvent for cleaning
- No compressor
- Less overspray

How to Use: First shake for 2 minutes vigorously before activating.

To activate: Simple take the red button from the cap and attach it to the pin on the bottom of the can. Put the top of the can on stable ground and push the red button firmly and press the pin into the can. Shake again for two minutes to ensure activator is thoroughly mix with topcoat. After activated, this product will last approximately 24 hours.

Product Characteristics: Spray Max 2 part Aerosol has excellent adhesion to basecoat and cured lacquer and enamel finishes.

Preparation: Allow basecoat paints at least 30 minutes dry time prior to using the 2K Spray Max Urethane Aerosol. Apply 2-3 coats of aerosol topcoat. Allow 5-10 minutes between coats. After allowing approximately 24 hours dry time, It may be polished by hand or machine.
