PTW24.72CC			72	2556	CHROME	31

*Based on 180 average water temperature

Pensotti Towel Warmers provide just the right combination of stylish European design and efficient functionality at an economical price.

The Pensotti Towel Warmer can be used anywhere in the home but is perfectly sized for providing additional heat in bathrooms.

Available in both straight and curved designs, with white and chrome finish options, and a variety of heights and BTU outputs the Pensotti Towel Warmers will accommodate almost every space.

All Pensotti Towel Warmers feature bottom pipe connections and include the mounting hardware. Multiple valve and pipe adapter options to accommodate all piping scenarios are available separately.

When using the optional TRV valves individual temperature control is possible for added comfort and efficiency.

All Pensotti Towel Bar Warmers have a 5-Year Warranty.

DIMENSIONAL INFORMATION

Radiator Model	Length	A	B	C	D
Straight	23 1/4"	2 1/8"	3 3/8"	2" o.c.	21 7/8" o.c.
Curved	23 1/2"	1 1/34"	4"	2" o.c.	21 13/16" o.c.

PANEL RADIATORS

Pensotti Panel Radiators combine the comfort of radiant heat with an elegant contemporary design. These attractive radiators have been providing unsurpassed comfort and efficiency in European homes for more than 40 years. Because they are extremely versatile they can be used as a primary heating system, a supplement to a radiant floor system, or in conjunction with traditional heating sources.

Virtually silent in operation, Pensotti Panel Radiators eliminate the noises associated with other types of heating systems. Unlike conventional baseboard which provides only convective heat, panel radiators emit both radiant and convective heat to produce a blanket of unequaled warmth.

Wall mounted and uniquely designed, Pensotti Panel Radiators are durable, easy to clean and reduce the areas where household dirt and dust might collect. When compared to conventional baseboard, Pensotti Panel Radiators require just one quarter the amount of wall space, allowing for more flexibility in room design and furniture placement.

An integral thermostatic valve with flow setter is standard on each radiator. Combined with an optional non-electric operator, automatic room by room temperature control is achieved resulting in additional comfort and energy efficiency.

Pensotti Panel Radiators are quick and easy to install with the supplied snap-in mounting brackets, bottom pipe connections and reversible mounting.

All Pensotti Panel Radiators have a 10-Year Warranty.

Four different radiator valves are available to make system design, installation and maintenance quick and easy

Pensotti Snap-Grip mounting brackets make radiator installation and removal a snap

- Installation in closed-loop hot water systems only
- Max operating temperature - 250°F
- Max operating pressure - 145 psi
- Not for use in steam systems
- Radiator can be turned 180° to allow for either left or right hand pipe connections
