Keystroke Point Of Sale

V6 ENHANCEMENT SUMMARY

NEW LOOK AND FEEL

- *New logo and entry screens with improved security.*
- *Enhanced graphical user interface (GUI) with automatic font sizing for improved readability on small monitors and at high resolutions.*
- *Optional legacy display mode for power users and maximum transaction entry speed.*

MORE FLEXIBILITY AND CONTROL

- *New Photo Viewer control features, plus now attach photos to individual Matrix items and Customer Contacts.*
- *Customizable Item Detail display in Sales, Purchasing, and Variance modules.*
- *Improved INI file settings for maximum control and configurability.*

OTHER VALUABLE NEW FEATURES

- *New Gift Card Triggers give you total control of how gift cards are sold, redeemed, and reported.*
- *Unique Quote features are now fully integrated into the Sales Manager module.*
- *New Dataport access via Scripted items provides tighter real-time integration to 3rd-party software.*
- *Variance Reports are now editable using the updated report engine.*
- *New Product ID codes allow activation of a software license without a License diskette.*

IMPORTANT DATA SECURITY UPDATE

- *Updated to comply with the Payment Card Industry (PCI) Data Security Standards and the Visa USA Cardholder Information Security Program (CISP).*
- *Help prevent fraud and reduce liability risks. Storage of payment card data is limited to account numbers and expiration dates, and is protected by encryption and display masking. (Keystroke POS does not retain full magnetic stripe data or CVV2 data from credit card transactions.)*
- *Improved data encryption routines and new security controls to help keep all valuable business data safe, including sensitive credit card data.*
- *Learn more about the PCI and CISP protocols for fraud prevention and risk management at www.USA.Visa.com/business.*

IMPROVED PAYMENT PROCESSING INTEGRATION

- *Improvements to MercuryPay, Keystroke's fully integrated credit card, check, and gift card processing software.*
- *Lightning fast payment authorizations via internet or new Dial-Up option (non-IP). Use Dial-Up as a primary connection or as a reliable automatic backup mode.*
- *Process credit cards directly in Accounts Receivable.*
- *Support for the Ingenico enTouch 1000 PIN Pad allows ATM/debit transactions plus the convenience of electronic Signature Capture.*
- *The popular Verifone Everest PIN Pad is now supported for ATM/debit transactions.*
- *For more information or to apply for a rate matching account with FREE Gift Card processing, call Mercury Payment Systems at 800-846-4472 or visit www.MercuryPay.com. No application fee, no term contract, automatic daily settlement, and real-time internet reporting.*

This listing represents only the most significant features added since v5.20. If you are currently running Keystroke v5.1 or earlier, the Version 6.0 Update will also provide many other valuable enhancements released in previous versions. To learn more about features you need that are not listed here, please contact SBS or your local Authorized Keystroke POS Dealer.
