Pewag Security Chain comes in three sizes - 9/32" (7mm), 3/8" (10mm), and 1/2" (12mm). All sizes come in a galvanneal finish. Pewag's PW-3012 chain has been replaced by PW-56847. These chains work well for securing bicycles, scooters and other similar items. With a surface hardness of 62 HRC, you have to see our video to believe how difficult it is to cut!

Laclede's Galvanized Security Chain comes in two sizes - 3/8" (10mm) and 1/2" (13mm) and is made in the USA. Laclede's security chain has the highest Rockwell Hardness we carry, making it the most difficult to penetrate. Laclede is actually the primary chain manufacturer we use for building our Grade 100 chain slings because we trust their quality.

Peerless' 7/16" (11mm) Security Chain is a high alloy chain drawn in a six-sided (hexagonal) shape and is heat-treated all the way through to 53-58 HRC for extreme hardness. The hex shape does not allow bolt cutters to get a proper bite, which prevents thieves from cutting the chain. It is ideal for securing equipment or portable tools at a jobsite or for general purpose security.

ABUS Security Chain comes in two sizes - 3/8" (10mm) and 1/2" (12mm), is pre-cut to lengths of 2', 6' and 10', and comes installed with a permanently affixed chafe sleeve. Unique end links are elongated to allow them to slip through each other, allowing them to nest perfectly in ABUS's specially designed padlocks. Security provided by world-class German engineering.
