NOTICE: Please use this measurement chart as a guideline to assist in determining the most appropriate size to order. Please note that in the process of manufacturing a handmade gown, actual gown measurements may vary. Consideration should be given as to whether the bride would prefer a firmer or more relaxed fit. It should also be noted that not all brides will proportionally follow our standard measurement chart. We suggest in this case to evaluate the style's fit points and order accordingly, i.e. a bride's hip measurements may be of little consequence when ordering styles with a full or wide A-line skirt, but may be of particular importance with a straight column styled skirt. Maggie Sottero Designs is renowned in the bridal industry for a superb fit. However, some alterations may be necessary to achieve an individual custom fit. The bicep measurement applies to styles from F21 and forward. For previous season gowns please contact the concierge team.
